

Tell

Tell is the result of a new and exciting cooperation between Örsjö and the Sedish design Trio Addi. Tell is designed for the working space, the conference room or why not the reception area. It comes with a strong graphic expression and offers a mix of classic and modern shape in Örsjö's classic materials.

With the combination of a powerful light source and an external rotatable cone, we are able to create direct and indirect lights, that can be easily adjusted depending on mood or need.
