Afterroom Stool

A study of unity between functionalism and minimalism, the Afterroom Stool is the ultimate expression of the Bauhaus-inspired Afterroom series. It is a stool cut back to the absolute necessities, yet it still operates as an integral part of an overall space, adding strong, clean lines to any room.

How do you strip away even more from an already pared-down chair, including the backrest, yet retain a high level of comfort? Stockholm-based design duo Afterroom answers this question with their eponymous stool, a piece of furniture that manages to be both quiet and attention-grabbing at once.

The Afterroom Stool is rendered in black powder coated steel and comes with or without an upholstered seat. The stool is available in three heights—stool, counter stool, and bar stool—making it easy to slide up against a bar or keep in the home as small-space or additional seating. In keeping with the original Afterroom chair series, this extension of the hugely popular line is bound to be embraced by those looking to enhance the seating in their commercial or residential spaces.

The line between a chair and a stool may be the simple curve of a backrest, but the design process is as meticulous for one as the other. The Afterroom Dining Chair was MENU's first foray into the world of chair design. Given the Scandinavian heritage in iconic chair design, we knew that this chair needed to be special. Stockholm-based Taiwanese design team Afterroom was tasked with creating a chair that was both minimalist and comfortable, with a silhouette that was both sleek and instantly recognisable. The three-legged Afterroom Dining Chair, with its distinctively small backrest and swan-like swoop of the neck, hits the mark perfectly.

Upholstered and bar-level versions followed. The newly-released Afterroom Stool takes the series a step further, to a place of ultimate minimalism and easy comfort. With clean lines and a sturdy base, the Afterroom Stool is as much at home pulled up to the window of a coffee shop as it is around the dinner table.

About the Designer

MENU, the Danish design brand with a vision to shape the future of modern living, is expanding its furniture collection with a Danish design classic: the Knitting Chair, created by architect and furniture designer Ib Kofod-Larsen in 1951. Capturing the essence of MENU, the lounge chair unites innovative form with traditional craftsmanship, bringing breathtaking materials and details, calm, natural tones, and an expressive presence to modern spaces. As MENU grows internationally and enters a new era in its history, the Knitting Chair naturally joins the collection as a symbol of what it means to be a true classic.
