

LAULU WITH MATTI KLENELL

- CABINET HIGH

Made
By
Choice

DESCRIPTION

Due to the skilled CNC wood milling know-how in the Made By Choice factory, located outside Salo in a building once used by the Finnish home electronics company Salora, the chair came to take its initial inspiration from old school hifi design with its often perforated wooden surfaces. This concept led further in to a piece of furniture rooted in tradition but with an absolute contemporary expression.

MATERIAL

Ash
